Grigory Gulyuk

Machine learning engineer and researcher

Placeholder City · LinkedIn · GitHub · hello@gulyuk.com

ABOUT

Placeholder summary. I build and study machine learning systems, mostly the unglamorous parts: evaluation, data, and the small experiments that decide whether an idea is worth a month.

EXPERIENCE

Feb 2023 — present

Senior Machine Learning Engineer
· Company A (placeholder)

Remote

- Placeholder. Led the evaluation harness for a ranking model used by several product teams.
- Placeholder. Cut offline experiment turnaround from days to hours with a cached feature pipeline.
- Placeholder. Wrote the internal guide on reading learning curves honestly.

#ml #tools

Jun 2020 — Jan 2023

Machine Learning Engineer
· Company B (placeholder)

Placeholder City

- Placeholder. Shipped a function-approximation service for sensor calibration.
- Placeholder. Replaced a hand-tuned heuristic with a small model that was easier to test.

#ml #math

Sep 2018 — May 2020

Research Assistant · University Lab (placeholder)

- Placeholder. Studied approximation error of small neural networks on smooth targets.

#math #visualization

EDUCATION

2016 — 2018

MSc, Applied Mathematics (placeholder) · Placeholder University

Thesis on approximation theory.

SKILLS

Machine learning	PyTorch, JAX, scikit-learn, evaluation design, experiment tracking
Engineering	Python, TypeScript, Vue, Nuxt, SQL, Docker
Visualization	D3, SVG, Canvas, interactive explanations
